

Bolted Steel Shelving

Open Braced Bolted Steel Shelving is the most basic and economical shelving design for general purpose use. Back and sides are open, except that sections are stabilised by means of cross braces on the back and sides.

Closed Back and Side Bolted Steel Shelving units are closed on three sides with steel panels to provide stability, protection of the items stored and to promote cleanliness of these items. When units are joined side by side and back to back, a common side or back panel is used between the two units achieving a large cost saving.

- ▶ These units are assembled into rows of units side by side and back to back and are of sufficient strength to support Mezzanine Floors.
- ▶ Krosts storage experts will design the correct storage solution to maximize your storage space in the most economical manner.
- ▶ Site visits, Computer Aided Designs (CAD) and quotations are provided free of charge.

High Quality Paint Process

All our products have baked epoxy powder coated finish and pass through a 5-stage chemical cleaning process. Powder is applied to an average thickness of 55 microns as per SABS 1274-1979 type 2 method 141 prior to oven baking at 210° Celsius for 15 minutes. All paint specifications are independently verified to conform to SABS standards by Corrosion Advisory Technical Services.

Component Parts

General Purpose Steel Shelving is a space-effective and economical storage system for virtually any light duty application. Manufactured from quality steel and modular in design, General Purpose Steel Shelving is designed for versatility and ease of installation, and can be easily adjusted or relocated. A comprehensive range of accessories is available including shelf dividers, drawers and kickplates.

About Krost Shelving and Racking

Established in 1965, Krost Shelving and Racking is that rare combination of trusted family business and proudly South African innovation. These unique qualities have allowed us to become one of the largest privately owned storage, warehousing and retail product manufacturing companies in Africa with a strong representation throughout sub Saharan Africa.

Since its inception in 1965 Krost Shelving and Racking has become entrenched as a household name in South Africa and was one of the first companies in the country to receive the highly-coveted South African Bureau of Standards (SABS) mark for excellence of quality standards.

With a current staff compliment of more than 140 highly dedicated workers, spearheaded by our CEO Uri Krost, we offer a unique, hands-on approach that focuses on personal attention, product expertise and unparalleled service. No job falls beneath or above the scope of our professional team of staff who continuously work to improve and upgrade the company's products, knowledge and service.

Our core values:

- Deliver an excellent product at an unbeatable price – both quality and affordability direct the company's vision.
- Provide an unparalleled service – Krost Shelving and Racking has instituted a continuous improvement programme to ensure that we meet the ever changing needs of our clients in the shortest possible time.
- Develop and nurture long-term relationships with our customers – this strength has allowed us to understand the intense nature of our clients' business needs and in so doing has made us an indispensable business partner.

Krost Racking and Shelving operates from our 17 000 m² premises in Wadeville and is an ISO 9001 accredited factory.

BOLTED STEEL SHELVING

Durable shelving ideal for use in warehouses, offices and retail stores.
